EMPLOYMENT

Bank of Finland, Finland
Research Economist

Aug 2025 - Mar 2026

EDUCATION

GSEFM, Goethe University Frankfurt, Germany
MSQ / Ph.D. in Economics (*Summa Cum Laude*)

Oct 2018 - Jul 2025

Seoul National University, South Korea
M.A. in Economics

Mar 2015 - Feb 2018

Sungshin Women's University, South Korea
B.A. in Economics

Mar 2011 - Feb 2015

WORKING PAPERS

Going Public over the Business Cycle

Job market paper

Abstract: This paper analyzes the role of Initial Public Offerings (IPOs) on employment cyclicity. Using Compustat data, I show that IPOs are cyclical in numbers and compositions and that the economic conditions at the time of IPO have long-lasting effects on subsequent firm growth. An important factor driving this result is the procyclical amount of capital raised from IPOs. Building on this evidence, I develop a firm dynamics model in which private firms decide whether to go public, while public and private firms decide about employment, investment, and exit in the presence of borrowing constraints. Crucially for the model mechanism, public firms face a looser borrowing constraint. The model is calibrated to match selected features of the U.S. non-financial firm sector and replicates the procyclical number of IPOs, selection patterns, and procyclical capital injections observed in the data. Using my model, I find that if IPOs were acyclical, the volatility of employment would be reduced by 10.4 percent. This amplification operates through two channels: first, a decline in the public firm share exacerbates capital misallocation; second, a lower propensity to go public reduces potential entrants' expected future value, decreasing entry rates. These findings suggest that policies mitigating IPO cyclicity during recessions could facilitate a faster recovery in aggregate employment.

Firm Expectations, Innovation and Growth

(with Georg Duernecker, Marek Ignaszak, and Leo Kaas)

Abstract: Using a large and representative panel survey of German firms, we document sizable forecast errors in employment growth which decline with firm age and which are related to investment and R&D activity. Motivated by this evidence, we build an endogenous growth model with heterogeneous firms which learn their productivity from noisy signals, decide about innovation activity, employment, and exit. Aggregate productivity growth responds to a selection channel via firm entry and exit and to an innovation channel via R&D investments of heterogeneous firms. We calibrate the model to replicate the realized and expected firm growth rates over the firms' lifecycle in our data. We use the calibrated model to quantify the role of information frictions in the selection and innovation channels behind aggregate productivity growth.

SEMINARS AND CONFERENCE PRESENTATIONS (* SCHEDULED)

2026

- *The 46th Annual Meeting of the Finnish Economic Association** (Vaasa)

2025

- *Bank of Finland* (Helsinki)
- *Halle Institute for Economic Research* (Halle)
- *Korea Institute for Industrial Economics and Trade* (Sejong)
- *18th RGS Doctoral Conference 2025* (Dortmund)
- *Heidelberg University* (Heidelberg)
- *The Liverpool Workshop on Macroeconomics 2025* (Liverpool)
- *Royal Economic Society 2025 Annual Conference* (Birmingham)
- *XXVIII Workshop on Dynamic Macroeconomics* (Vigo)
- *2025 World Congress of the Econometric Society* (Seoul)
- *40th Meeting of the European Economic Association* (Bordeaux)
- *Scientific Workshop on Productivity* (Berlin)
- *Helsinki GSE Industrial Organization Seminar* (Helsinki)
- *National Bank of Slovakia* (Bratislava)
- *20th Annual Wien Macroeconomics Workshop* (Vienna)
- *Nordic Central Banks' Researchers Workshop* (Helsinki)
- *Helsinki Macro Research Away Day* (Helsinki)
- *TSER Seminar, University of Turku* (Turku)
- *Finance Brown Bag Seminar, Aalto University* (Helsinki)
- *2025 European Winter Meeting of the Econometric Society* (Nicosia)

2024

- *16th Nordic Summer Symposium in Macroeconomics* (Copenhagen)
- *VII Workshop of the Spanish Macroeconomics Network* (Madrid)
- *Frankfurt-Mannheim Macro Workshop* (Mannheim)
- *Fall 2024 Frankfurt Macro Seminar* (Frankfurt)
- *National Taipei University* (online)

TEACHING

Teaching Assistant for *Economics of Labor Market*

Apr 2022 - Jul 2024

Conducted 90-min tutorial sessions (×7 in 2022, ×6 in 2023, ×6 in 2024)

SKILLS

Program Matlab, Python, Stata, and L^AT_EX

RESEARCH

Chair of Macroeconomics and Labor Markets

Sep 2020 - Jul 2025

Research Assistant

- *Job Ladder and Wealth Dynamics in General Equilibrium* (Kaas, Lalé, and Siassi)

Macroeconomic Model Data Base
Research Assistant

Oct 2019 - Sep 2020

NRF-DAAD Summer Internship
Intern

July 2016 - Sep 2016

GRANTS & AWARDS

Royal Economic Society Scholar's Fund 2025

GSEFM Scholarship 2018 - 2019

NRF-DAAD Scholarship 2016

Grand Prize for *Local Finance Association Korea* Student paper contest 2016

Analysis of the Effect of Local Finance's Autonomy on Welfare Expenditure
(with Minyoung Kwon and Yongho Park)
