EDUCATION

GSEFM, Goethe University, Frankfurt, Germany
MSQ / Ph.D. in Economics

Oct 2018 - 2025 (expected)

Seoul National University, Seoul, South Korea
M.A. in Economics

Mar 2015 - Feb 2018

Sungshin Women's University, Seoul, South Korea
B.A. in Economics

Mar 2011 - Feb 2015

WORKING PAPERS

Going Public over the Business Cycle

Job market paper

Abstract: This paper analyzes the role of Initial Public Offerings (IPOs) on employment cyclicity. Using Compustat data, I show that IPOs are cyclical in numbers and compositions and that the economic conditions at the time of IPO have long-lasting effects on subsequent firm growth. An important factor driving this result is the procyclical amount of capital raised from IPOs. Building on this evidence, I develop a firm dynamics model in which private firms decide whether to go public, while public and private firms decide about employment, investment, and exit in the presence of borrowing constraints. Crucially for the model mechanism, public firms face a looser borrowing constraint. The model is calibrated to match selected features of the U.S. non-financial firm sector and replicates the procyclical number of IPOs, selection patterns, and procyclical capital injections observed in the data. Using my model, I find that if IPOs were acyclical, the volatility of employment would be reduced by 10.4 percent. This amplification operates through two channels: first, a decline in the public firm share exacerbates capital misallocation; second, a lower propensity to go public reduces potential entrants' expected future value, decreasing entry rates. These findings suggest that policies mitigating IPO cyclicity during recessions could facilitate a faster recovery in aggregate employment.

Firm Expectations, Innovation and Growth

(with Georg Duernecker, Marek Ignaszak, and Leo Kaas)

Abstract: Using a large and representative panel survey of German firms, we document sizable forecast errors in employment growth which decline with firm age and which are related to investment and R&D activity. Motivated by this evidence, we build an endogenous growth model with heterogeneous firms which learn their productivity from noisy signals, decide about innovation activity, employment, and exit. Aggregate productivity growth responds to a selection channel via firm entry and exit and to an

innovation channel via R&D investments of heterogeneous firms. We calibrate the model to replicate the realized and expected firm growth rates over the firms' lifecycle in our data. We use the calibrated model to quantify the role of information frictions in the selection and innovation channels behind aggregate productivity growth.

WORK-IN-PROGRESS

Global Value Chain and Immigrant Labor Market Outcome

(dwith Shiyun Hu)

SEMINARS AND CONFERENCE PRESENTATIONS

2025

- Bank of Finland
- Halle Institute for Economic Research
- Korea Institute for Industrial Economics and Trade
- 18th RGS Doctoral Conference 2025
- Heidelberg University
- The Liverpool Workshop on Macroeconomics 2025 (Scheduled)
- RES 2025 Annual Conference (Scheduled)
- 2025 World Congress of the Econometric Society (Scheduled)

2024

- FQMG Brownbag Seminar
- 16th Nordic Summer Symposium in Macroeconomics
- VII Workshop of the Spanish Macroeconomics Network
- Frankfurt-Mannheim Macro Workshop
- Fall 2024 Frankfurt Macro Seminar
- National Taipei University

2020 - 2023

- FQMG Brownbag Seminar

2022

- 31st IAFFE Annual Conference

TEACHING

Teaching Assistant for *Economics of Labor Market*

Apr 2022 - Jul 2024

Conducted 90-min tutorial sessions (×7 in 2022, ×6 in 2023, ×6 in 2024)

RESEARCH

Chair of Macroeconomics and Labor Markets

Sep 2020 - Present

Research Assistant

Macroeconomic Model Data Base

Oct 2019 - Sep 2020

Research Assistant

GRANTS & AWARDS

Royal Economic Society Scholar's Fund	2025
GSEFM Scholarship	2018-2019
Intern, NRF-DAAD Summer Internship	July 2016 - Sep 2016
Grand Prize for <i>Local Finance Association Korea</i> Student paper contest	2016
<i>Analysis of the Effect of Local Finance's Autonomy on Welfare Expenditure</i> (with Minyoung Kwon and Yongho Park)	

SKILLS

Computer Matlab, Python, Stata, and L^AT_EX

Last update: April 8, 2025
